

CPA Rising Pharmacist Spotlight: June 2021

Name and title:

Anthony J. Renzoni, PharmD, BCPS
Emergency Medicine & Burn ICU Clinical Pharmacist

Current position:

Clinical Pharmacist II & Student Experiential Coordinator
Bridgeport Hospital – Yale New Haven Health System

Years in practice: 3

Inspiration to practice pharmacy:

I wanted a career where I can work in an interdisciplinary team, care for a wide variety of disease states, and be a hands-on resource facilitating preparation and delivery of life-saving medications.

Proudest accomplishment:

Having my PGY2 pharmacy residency research “Emergency department methicillin-resistant staphylococcus aureus nare screen effect on pneumonia treatment duration” accepted for publication in the American Journal of Emergency Medicine (AJEM)

Future aspirations:

- Continue to expand pharmacy services in the Emergency Department as well as hospital wide with pharmacist response during cardiac arrests & stroke alerts at my current institution
- Provide guest lectures to local schools of pharmacy in my areas of interest
- Serve on local (CSHP/CPA) and national (ACCP - EMED PRN) committees working to advance the field of pharmacy and expand pharmacists’ scope of practice

Fun Fact:

I was born at and had a third-degree burn cared for by the burn service at the hospital where I now work!
